

# EPRTrack — Sample EPR Health Check

Example only — generated from the downloadable sample dataset.

| Metric                  | Result |
|-------------------------|--------|
| Records analysed        | 10     |
| Included in analysis    | 3      |
| Need review             | 7      |
| Duplicates              | 1      |
| Missing packaging data  | 1      |
| Invalid quantities      | 1      |
| Invalid dates           | 1      |
| Unit issues             | 1      |
| Category mapping issues | 1      |
| Suspicious records      | 1      |

## What happens to excluded rows?

Rows that fail validation are not silently used in the planning calculation. The downloadable review workbook highlights them in red and adds an “Error / Reason” column explaining why the row needs attention.

## Planning disclaimer

EPRTrack’s V12 health check is an indicative data-quality and planning workflow. It does not determine a legal EPR target, certify fulfilment, or replace the applicable CPCB/Common EPR Portal records and requirements.
